Company Profile

Project Quality Assurance (PQA) provides construction Quality Assurance Assessments (QAA) and other expert residential construction services for homeowners involved in residential construction projects, such as renovations, additions, and new construction. ProjectQA is dedicated to the owner's best interest, not the architect's or contractor's interest.

Services

ProjectQA offers a series of quality assurance assessments, providing our clients, the homeowners, with outstanding project benefits. These benefits not only translate into a better-finished project through quality controls, but also with greater project satisfaction. In addition, ProjectQA can offer construction and building code consulting to resolve issues. As your representative, we'll work with your architect and contractor to ensure your satisfaction. In order to preserve the highest level of integrity, ProjectQA doesn't work for contractors/developers, only with homeowners. The goal of ProjectQA is the positively affect the project's life, cost, quality, and your peace of mind.

Benefits

☐ Greater quality standards via improved QA measures. ☐ Ensuring the architect's/engineer's designs is followed. ☐ Team work/Partnership. ☐ Consulting that helps to prevent Stop Work Orders. ■ Better project quality controls, helping you pass inspections, every time. ☐ Advocate with the inspection agency/building department. ☐ Consulting for acceptable product, code, and construction options. ■ Better code compliance through quality measures. ☐ Lower project cost by avoiding costly mistakes and time delays. Improved project time management, avoiding costly delays.

Highlights

- ProjectQA represents the Owner's Best Interest.
- ProjectQA improves the project process with greater satisfaction.
